VIDEO SOLUTIONS & ACCESS CONTROL

HIGH DEFINITION VIDEO SURVEILLANCE

SOLUTIONS FOR ▼ EVERY APPLICATION

Why Choose i2c Technologies? ▼

i2c Technologies has been providing innovative IP video surveillance solutions and software for Ohio schools for over 12 years. Unlike other camera providers, our staff are IT professionals. Because each i2c Technologies Video Surveillance Solution comes complete with our own video management software, our clients do not have to pay for an expensive third party software platform. Every i2c network camera system is designed by an IT expert, and we only install world-class equipment, NEVER "black box" equipment that may be infected with spyware and is difficult to update. Because we realize that protecting your school shouldn't endanger your network's security and performance.

We Design Smart, Affordable Solutions for Every Application ▼

If you're considering upgrading or replacing your school's current video surveillance technology, or if you would like to convert your current legacy analog cameras to a modern IP system, we can engineer a dynamic solution that is both reliable and affordable. And since i2c Technologies is an **Ohio state term schedule vendor** you can rest assured that you're getting the best price for the best equipment on the market.

Whether you're looking for video surveillance for your facilities, wireless cameras to monitor stadiums and parking lots, mobile surveillance for school buses, access control for entrances, or an integrated solution that includes all of the above, we can engineer a system to meet your needs.

Testimonial

It's an absolute pleasure to work with the folks from i2c. The software works as promised, video is vivid and clear, searching for archive footage couldn't be easier and every time we call for support we're met with a quick, accurate response.

-Jerry Bradford • Chief Information Officer, The Washington County Career Center
