Expert Design & Consultation for DIY Installations

HIGH DEFINITION VIDEO SURVEILLANCE

▼ SOLUTIONS FOR EVERY APPLICATION

i2c DIY ▼

If you want to purchase AXIS brand cameras and technology from a trusted source, and you want to do your own installation, then an i2c DIY quote is just what you need.

AXIS Communications is the market leader in network video and their world-class products are only available for purchase through designated channel partner companies, like i2c Technologies.

i2c Technologies is proud to have earned the designation of AXIS Communications Solution Gold Partner for over 12 years. This is the highest level of partnership awarded by AXIS, so you can have peace of mind knowing that you are working with a company that has the knowledge and expertise to design the perfect system for your enterprise.

Get a Quote

Call 888.422.7749 or request a quote online at i2ctech.com - A member of the i2c Tech Support team will gather the information needed to design your system and provide you a quote.

Whether you need wireless cameras, fixed cameras, access control, or an integrated system that includes all of the above, our experts can design a solution that meets your needs and your budget.

Every i2c DIY quote includes i2c Technologies advanced video management software (VMS) as an option.

Get the Benefits

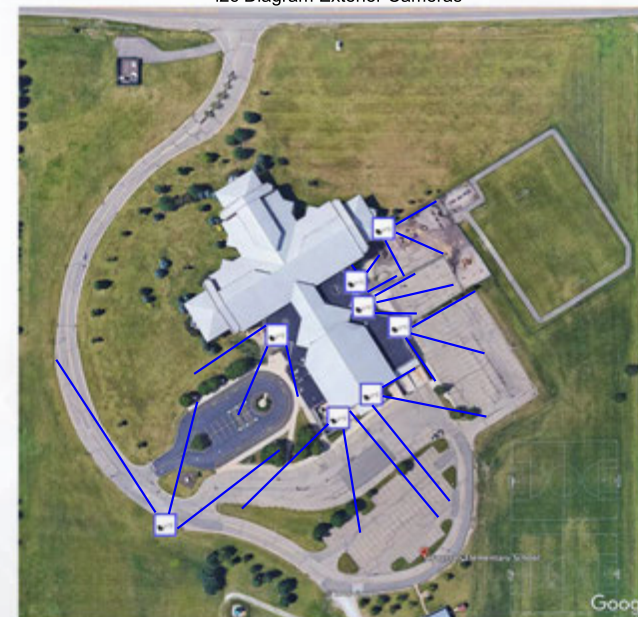

- Free Shipping on all AXIS equipment
- Free system design and consultation, by your dedicated i2c Tech Support Representative
- U.S. based Tech Support
- Advance replacement product service
- One-year warranty on all parts, labor, support, and software updates
- Affordable extended service agreements to keep your system like new

View live video from
any mobile device
with i2c VMS

Get i2c VMS

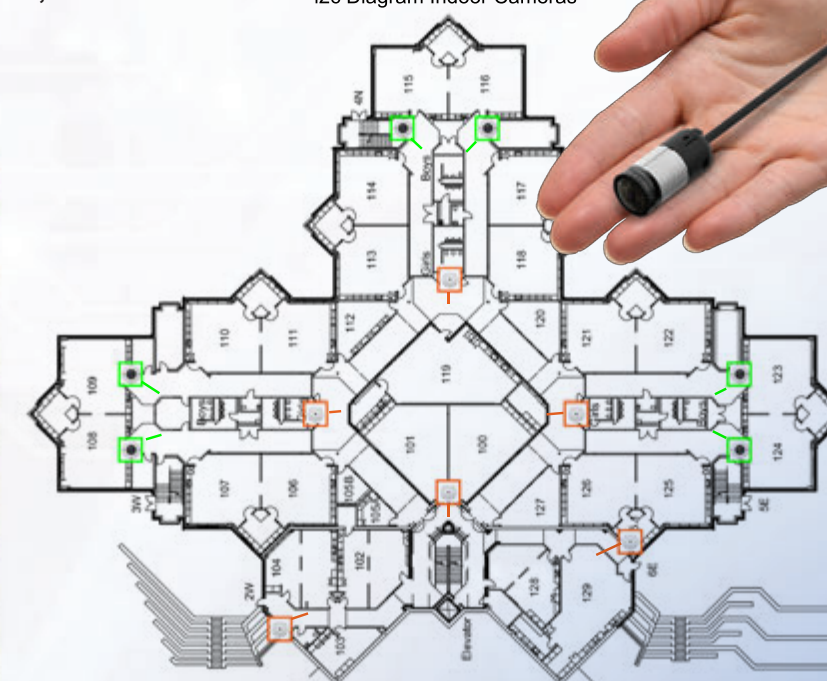

- Free remote software configuration, training and support by your dedicated i2c Tech Support Representative
- Video management software has an open platform that fully integrates with current security and operations systems (alarm, access control, fire, and PLC's)
- Full Microsoft Active Directory Support
- Software runs on standard file servers or a virtualized server environment
- Can support hundreds of cameras on one network
- User-friendly software offers easy retrieval, archive, and distribution of recordings
