i2c System Features ▼

- Indoor and/or Outdoor AXIS HD Cameras
- User friendly software with easy retrieval, archive, and distribution of recordings
- Software that can support hundreds of cameras on one network
- Software that runs on standard file servers or a virtualized server environment
- Wireless networking products that can extend the facilities' physical network anywhere cameras are needed
- Converters to upgrade existing analog cameras to modern IP
- Full Microsoft Active Directory Support
- Real-Time alerts and remote access via any mobile device
- One year warranty on all parts, labor, support, and software updates

Why Choose i2c Technologies? ▼

i2c Technologies, has been providing cutting edge network video surveillance solutions and software for healthcare facilities for over 12 years. Every i2c network camera system is designed by an IT expert, and comes complete with our own video management software, which eliminates the cost and hassle of expensive third party software licenses and renewals. Our clients have peace of mind knowing that we only install world-class equipment, like AXIS brand cameras, because we realize that protecting your facilities and assets shouldn't endanger your network's security and performance.

Smart, Integrated Solutions for Every Healthcare Application ▼

Whether you need wireless cameras to monitor parking lots and new construction, fixed cameras for waiting rooms and hallways, access control for entrances or restricted areas, a deployable system for temporary surveillance, or an integrated system that includes all of the above, we can engineer a solution that meets your needs and your budget.

An i2c Technologies IP video surveillance solution provides more than just security because we design systems to enhance your operations and improve efficiency, giving you the best return on your technology investment.

Want to do your own installation?

We offer free system design and software configuration for customers who want to install any AXIS cameras purchased through i2c Technologies.

Also Available ▼

- Network video door stations that support two-way communication and remote entry control
- HD cameras with wide angle view for superior hallway coverage
- VP400 Multi-Camera Deployable System with remote panic button
- VC400 Mobile Surveillance Cart
- Keyless gate/door entry solutions
- Thermal and infrared cameras
- Extended service agreement to keep your system like new

"Our hospital video surveillance system was built over a number of years by using equipment from several different manufacturers. i2c integrated our four separate recording/control consoles with all of our existing equipment into one streamlined command and control station."

-David Crawford • Security Detail Commander, Salem Regional Medical Center
