Integrated Access Control

SOLUTIONS FOR ▼ EVERY APPLICATION

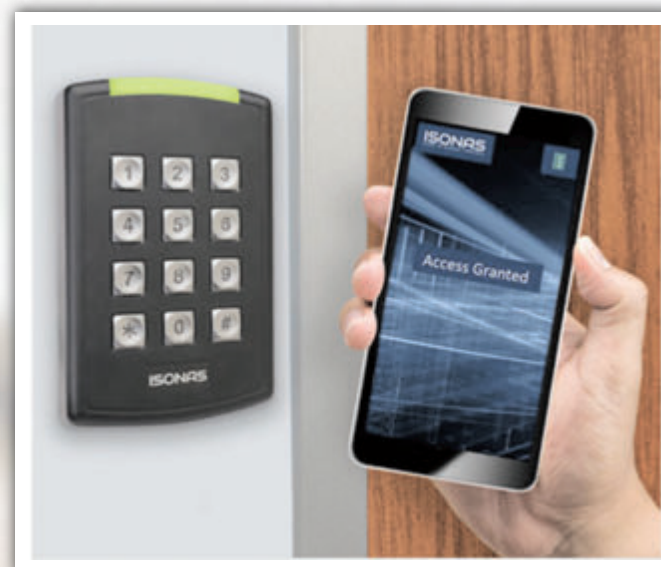

IP Access Control Solutions designed by i2c Technologies ▼

i2c Technologies has been at the forefront of designing, installing, and servicing integrated video and access control solutions for businesses and government entities for over 12 years.

Whether you need a single door solution or a solution for multiple facilities, our team of IT professionals can design a flexible and scalable access control system customized to suit your needs and your budget.

All of our access control solutions can be integrated to work in conjunction with other systems like, video surveillance, fire detection, intrusion detection, phone systems (SIP), Microsoft Active Directory, and more.

Because we only work with leading access control manufacturers, you can rest assured that you are getting the most reliable, best-in-class equipment on the market.

Available Features: ▼

- Card readers that allow access via printed badges, thin cards, key fobs and mobile phone app
- Card readers with keypad option that allow access via code number
- Browser based system administration
- Optional cloud based systems that eliminate the need for a local server
- Readers that utilize a single POE data cable
- Software with MAP view for central control
- Two-way audio/video door stations with door control
- HID card compatibility
- Systems that utilize existing network infrastructure
- Remote entry control with desktop or mobile devices
- U.S based technical support
- One year warranty on all parts, labor, support, and software updates
- Ohio state term pricing for government entities
