

Intelligent Video Surveillance

**INTEGRATED SOLUTIONS FOR
MANUFACTURING FACILITIES**

i2c
Technologies

Why Choose i2c Technologies? ▼

i2c Technologies, has been providing cutting edge network video surveillance solutions and software for manufacturing facilities for over 12 years. Every i2c network camera system is designed by an IT expert, and comes complete with our own video management software, which eliminates the cost and hassle of expensive third party software licenses and renewals. Our clients have peace of mind knowing that we only install world-class equipment, like AXIS brand cameras, because we realize that protecting your facilities and assets shouldn't endanger your network's security and performance.

Smart, Integrated Solutions for Industrial Sites ▼

Whether you need wireless cameras to monitor parking lots and new construction, fixed cameras for production lines and aisle ways, access control for entrances or restricted areas, a deployable system for temporary surveillance, or an integrated system that includes all of the above, we can engineer a solution that meets your needs and your budget.

An i2c Technologies IP video surveillance solution provides more than just security because we design systems to enhance your operations and improve efficiency, giving you the best return on your technology investment.

Want to do your own installation? We offer free system design and software configuration for customers who want to install any AXIS cameras, purchased through i2c Technologies.

"We use i2c for all of our video surveillance needs. I like the fact that they can provide a finished project from design to installation." Ian Arth, Sr. Operations Analyst, Timken Steel

VC400 Mobile Surveillance Cart for temporary surveillance

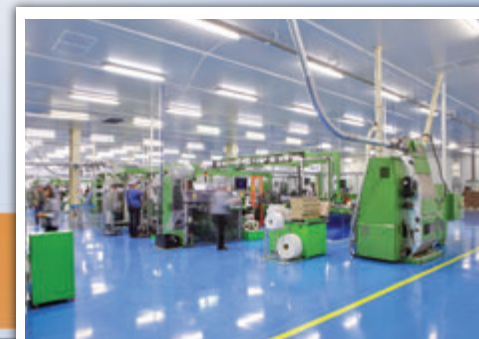

SOLUTIONS FOR EVERY APPLICATION

i2c System Features ▼

- Indoor and/or Outdoor AXIS HD Cameras
- User friendly software with easy retrieval, archive, and distribution of recordings
- Video management software that can support hundreds of cameras on one network
